

The 3rd meeting between Enerscapes partners has took place in **Lyon**, Rhone-Alpes.

The first day has been a workshop mainly focused on Pilot experiences. The topics which have been discussed have concerned the implementation of different scenarios which are based on different degrees of importance given to RES and/or to landscape. The assessment of these scenarios implying local governance has also been presented and at the aim of the workshop partners started to draw the main trend of an action plan methodology.

The second day of the meeting has consisted of a study tour in one of the French pilot area, located in the natural regional park of Bauges (in the Alps). It has included the visit of a biogas plant and some meeting with a landscape expert of the territory.
